

From the Danville (Ky.) Tribune.

**CUMBERLAND SILVER MINES.**  
The following is the report of the two committees, which were selected by Jas. V. Symons, Esq., to witness certain assays of the ore at the Cumberland Falls, on the 20th day of November, 1850:

**CUMBERLAND FALLS, Nov. 20th 1850**  
We, the undersigned, being selected by James V. Symons, Esq., as constituting his first committee to witness and examine the first assay or test of the ore at this place, which was to be made by him in pursuance to notices heretofore given in the newspapers, &c., do make the following report, to wit:

Inasmuch, as there had been considerable excitement as well as great doubts manifested by many, as to the true qualities of said ore, and being desirous that all such doubts should be finally removed and put to rest, the one way or the other, and in order that every fact which could be necessary to the final accomplishment and attainment of this end, should be brought to bear, and the more especially as many of us came upon the ground under the firm belief that there was no silver in said ore. In the first place, we proceeded to the bank or mine from which said ore was taken, and then and there caused a piece or lump of the same to be dug out in our presence; we then carried the same to the assaying furnace, where we carefully pulverized it, and witnessed the mixing thereof with the fluxes, and then and there saw the crucibles placed in said furnace, and carefully and critically attended to the whole process of assaying and smelting the ore contained in said crucibles, which produced the following result: two ounces of the ore yielded 16 grs. of pure silver, amounting to 593,13-19 ounces to the ton of ore.

They would further report that this was not a fair assay, owing to the fact that the coal used was not well cooked and furnace being in bad order, the continued press of the surrounding crowd, the loss of some of the metal in pouring the same out of the crucible, the want of proper implements, &c., in consequence of which we think at least one-half of the pure metal was lost.

Neither Professors Schaeffer or Peter being present, and having, as we understand, alleged that silver was put in the fluxes which had heretofore been used by Mr. Symons, in order to produce silver from said ore, or to have the appearance of doing so, and the committee, not being prepared to analyze said fluxes, at the request of Mr. Symons a portion of each flux was put in the hands of Dr. P. Mason and Chas. Ridgeway, Esq., to be handed to Prof. Schaeffer, of Danville, for his examination, there being no one present to bear any of them to Prof. Peter.

Inasmuch as we understand there have been some charges of fraud, imposition, juggling, &c., made against Mr. Symons in regard to the tests which he has heretofore made of said ore, we take great pleasure in saying that he was perfectly free in exhibiting all his fluxes, and in explaining, to us as far as possible, the whole principle upon which the assay was made, and the result, and we have no hesitation in saying that, in our opinion, he is an accomplished scholar, and a perfect gentleman, and in all respects skilled and well qualified to perform the duties of an assayer and smelter, and that he is wholly incapable of the commission of fraud, imposition, trickery, or juggling, and that we look upon him and feel proud to acknowledge that he is one of Kentucky's greatest benefactors, and that his name will be written upon the bright pages of history in future ages, as a benefactor to posterity, and as such we tender him our most sincere thanks.

The Second Committee would say, that they fully and in all respects concur in the statements and declarations made in the foregoing report, with the exception of the result of the assay made in our presence, which is as follows: two ounces of the ore produced 31 grains of pure silver, making 1150 5-19 ounces to the ton of ore.

**FIRST COMMITTEE.**  
Charles Ridgeway, Danville, Ky.  
John Pogue, Barbourville, Ky.  
C. M. France.  
Samuel E. Booker, Washington county Ky.

Thomas W. Nantz,  
R. M. Cobb, Knox co. Ky.  
W. W. Bicket, Marion co. Ky.  
J. D. Scott, Stanford, Ky.  
P. B. Mason, Boyle co. Ky.  
**SECOND COMMITTEE.**  
J. D. Scott, Stanford, Ky.  
P. B. Mason, Boyle co. Ky.  
T. M. Doolin, Pulaski co. Ky.  
E. Kelly,  
Jos. Porter, Somerset, Ky.  
W. F. Scott,  
M. Vanwinkle, Wayne co. Ky.  
Francis N. Goddard, Wayne co.  
John Chesong, Casey co. Ky.  
Thomas Rockhold, Whitley co. Ky.  
Joseph B. Stockton, Edmonson, Barren co.  
Jas. F. Marrs,  
A. E. Pogue, Barbourville, Ky.

**ANOTHER VICTIM OF RUM.**—The Wilmington (Del.) Gazette states that Prof. Ansley, a young man of fine acquisitions, whose classical attainments are well attested in a work entitled "Elements of Literature, or an introduction to the study of Rhetoric and Belles Letters," published in 1849, by Lippincott & Co., of Philadelphia, died in that city on Monday last, after being found in an almost frozen condition in an old hovel, with a bottle of whisky by his side. He recently held the position of Professor of St. Mary's College, at Wilmington, from which he was removed on account of his inebriate habits. He continued, however, his course of dissipated habits, until he was reduced to a condition of utter destitution—homeless, and homeless, friendless, and penniless—he was driven to the extreme of starvation, wandering about, seeking shelter wherever chance directed him.

**PATENT DEVILTRY.**—A new thing has lately presented itself to public favor, which is as complete a specimen of patent devilry as human ingenuity can devise—an infernal machine, compared with which in its capacity for dealing destruction and death, the device of a Fieschi is but a plaything. It consists of a small capsule composed of gum and sugar, enclosing about a fourth of a teaspoonful of brandy, just about enough, with the excited saliva, to make a snail today in the mouth, adapted to the ambition and capacity of the rising generation. These things, it appears, are sold at the confectionaries in the large cities north and east.—Five cents worth of them contain about a table spoonful of brandy, enough to give a boy, as an initial operation at least, quite an experimental notion of a "drunken spree." Who claims the honor of this invention we do not know, but the article seems first to have attracted the attention of a Dr. Jewett, of Rhode Island, who has warned parents and the public at large against them.—*Baltimore Sun.*

"Tell," a correspondent of the Boston Post, wrote the following, which contains a wicked word, and should not, therefore, be read by anybody:

County court was sitting a while ago, in—on the banks of the Connecticut. It was not far from this time of year—cold weather, any how—and a knot of lawyers had collected around the old Franklin, in the bar-room. The fire blazed, and mugs of flip were passing away without a groan, when in came a rough, gaunt looking "habe of the woods," knapsack on shoulder and staff in hand. He looked cold, and half perambulated the circle that hemmed in the fire, as with a wall of brass, looking for a chance to warm his shins. Nobody moved, however; and, unable to sit down for lack of a chair, he did the next best thing—leaned against the wall, "with tears in his fists and eyes doubled up"—and listened to the discussion on the proper way of serving a referee on a warrant deed, as if he was the Judge to decide the matter. Soon he attracted the attention of the company, and a young sprig spoke to him. "You look like a traveler." "Wall, I s'pose I am—I come from Wisconsin! That is a distance to go on one pair of legs. I say, did you ever pass through hell on your travels?" "Yis sir," he answered—a kind of wicked look stealing over his ugly phiznagogany—"I thought likely. Well, what are the manners and customs there? some of us would like to know." "Oh," says the pilgrim deliberately—half shutting his eyes, and drawing round the corner of his mouth till two rows of yellow stubs with a mass of masticated pig-tail appeared through the slit of his cheek—"you'll find them much the same as in this region: the lawyers sit highest the fire."

**PROMPT PULLETS.**—Mr. S. S. Lawrence, of Tyngsborough, Massachusetts, has a Shanghai pullet, eight months old, that has laid forty-two large size eggs in forty-five days. One day she laid two of the above number. Mr. Lawrence, also, has one other Shanghai pullet, seven months old, of Marsh's stock, that has laid twenty-two eggs in twenty-three days, and is laying daily, at the present date.

**FREAK OF NATURE.**—A lady of distinguished rank in Paris, lately gave birth to a child, which, though otherwise well formed, was totally without brain. The young creature, like the sensitive plant, experienced the liveliest emotion upon being touched. The top of the head was completely flat, which, joined to a long and narrow jaw, gave to the face the resemblance of the head of a rabbit. It lived twenty-two hours, to the great astonishment of the doctors who had assembled to inspect this extraordinary phenomenon.

**WANTED.**—A few bushels of Irish Potatoes. Apply at this office.

**DIED.**—In Benton, Polk County, on Saturday morning, 1st instant, LUCINDA P. FISHER, aged one month and eleven days.

#### A CARD.

**MRS. HUMPHREYS** proposes instructing a class of young ladies in Drawing, Painting, and Embroidery, at her residence, Lessons commencing on the 31st March—terminating the last of July.—Every kind of ornamental needlework is embraced in the term Embroidery—on Satin, with silk floss—Chanelle—Crapes—Beads, &c. French work in all its superb and innumerable varieties. Worsted work, from its simple elementary stitches to the latest and most improved Berlin patterns.

The lessons in Drawing will be elementary and progressive. She cannot promise her young friends proficiency in this elegant and essential branch of genteel education in a few brief lessons; but will try, in an easy and perspicuous manner, to instruct in the theory and practice of perspective—in drawing and coloring landscape scenery—animals, and the human figure, and also in the delightful art of painting flowers from nature—and hopes, from an intelligent familiarity with the rules of the art, they will be able soon to produce drawings free from those coarse errors so frequently met with, and so disgusting to the eye of the Amateur.

The forenoon of each day will be devoted to a small class in Eng. Science. The course shall be thorough and efficient in this department.  
Embroidery (Wed. and Fri. p. m.) \$5.00  
Drawing and Painting (Tuesday and Thursday,) 8.00  
Literary Department, 7.00  
Monday afternoon will be devoted to composition and reading the best authors for improvement. All the classes will be expected to participate in these exercises.  
February 4, 1851.—3t 124

#### Athens Female Academy.

The Second Session of the Athens Female Academy, under the charge and management of Miss O. E. Marchbanks, will commence on the 17th day of February, 1851.

From the general satisfaction expressed by the patrons of the Academy, at the manner in which the institution was managed during the First Session, the Trustees are warranted in giving assurance to parents who have daughters to educate, that they will be gratified in all they desire by placing them under the care of Miss Marchbanks.

Prof. G. R. KNABE will continue in the Musical Department. His reputation as a Teacher of Music renders it unnecessary to say anything in regard to his qualifications. He will also give lessons, if desired, to others not members of the School.

The tuition fees and incidental expenses will be as follows:  
Spelling, Reading, Writing, Arithmetic, English Grammar and Geography, \$7.00  
French, Italian and Spanish Languages, Mathematics, Natural Philosophy, Moral Science, Astronomy, &c., 10.00  
Drawing, Painting, &c., 3.00  
Music on the Piano, 15.00  
" " Guitar, 15.00  
Incidental Expenses, 1.00

The Trustees have the assurance from several of the most respectable families of the place that they will board young ladies, including light and fuel, at from \$1.50 to \$2.00 per week.

**VISITORS.**  
Rev. Mr. Lyon, R. C. Jackson,  
Rev. Jacob W. Miller, S. K. Reeder,  
James S. Bridges, T. J. Campbell, Jr.,  
R. N. McEwen, Geo. W. Bridges.

**TRUSTEES.**  
A. McKelvin, James Gettys,  
J. F. Glover, A. D. Keys,  
Richard Haley, T. N. Van Dyke,  
H. H. Rider,  
Feb. 7, 1851.—tf 124

June 7, 1850.—ly 89

#### School Books

PUBLISHED BY CADDY & BURGESS,

Booksellers and Stationers,

60 John st., New York.

**SMITH'S FIRST BOOK IN GEOGRAPHY** is a simple, concise, comprehensive, and useful treatise for children. It begins with the very first elements, and proceeds step by step at a pace adapted to that of a child. He is made to understand what he learns. It is illustrated with 126 Engravings and 20 elegant Maps.

**Smith's Quarto, or Second Book of Geography**—The arrangement and plan of this work is very generally approved by teachers—the maps standing upright in the book and facing the text, printed from steel and copper plates with great clearness and distinctness, made so by bright and distinct coloring, the letter-press being the finest of school book work, and the whole in style and beauty superior to other Quarto Geographies.

**Smith's Geography and Atlas**—This work, so favorably known to the public, forms the third book of the series, and is designed for those who desire a more extended course than is contained in the foregoing books.

**Smith's Introductory Arithmetic**—Consisting of Questions and Tables to employ the mind and fingers only, to go before the slate and prepare for it.

**Smith's Practical Mental Arithmetic**—Containing Mental Arithmetic with the use of the slate. This work has long been before the public, and is well known to most teachers.

Key to the above for teachers.  
**Smith's New Arithmetic**—12mo., in which the whole of Arithmetic is embraced in one book, divided into Three Parts. It is adapted to all classes of learners. There are many things new in this work, and of practical utility to men of business.

Key to the above for teachers.  
**Claggett's Elocution, or Elocution Made Easy**—Containing rules and selections for declamation and reading, with figures illustrative of gesture.

**The American Expositor, or Intellectual Definer**, designed to promote the general adoption of a systematic course of instruction in the English language.

#### TOWER'S SERIES.

**The Gradual Primer, or Primary School Enunciator**, Part I. The Child's First Step, taken in the right place. A new plan of teaching the alphabet, combining the advantages both of the old and the modern methods, and avoiding the disadvantages of each—with full directions to teachers for the correct and distinct utterance of the elementary sounds—one element at a time.

**Introduction to the Gradual Reader, or Primary School Enunciator**, Part II. The Child's Second Step at the right time. The pupil is gradually introduced to the simple consonant combinations, the points, &c., by progressive exercises kept distinct from the Reading Lessons—that only one thing may be taught at a time.

**Intermediate Reading, or Primary School First Class Book**, with Elementary Exercises in articulation and the First Principles in Elocution; designed to follow the Introduction and to precede the Gradual Reader.

**The Gradual Reader** contains besides the Reading Lessons an original system of articulation, consisting of exercises upon every vowel and consonant element, and every vowel and consonant combination in the language—the first ever published, and the only complete system. Also, Tables for simultaneous practice.

**The Second Class Reader**, the Fourth Book of Tower's Series for Common Schools, developing principles of Elocution, practically illustrated by Elementary Exercises, with Reading and Lessons in which reference are made to these principles designed to follow the Gradual Reader.

**First Class Reader, or Fifth Book of Tower's Series for Schools**, in which the higher principles of Elocution are explained and illustrated by appropriate exercises; designed to follow the Practical Reader.

**The Gradual Speller, and Complete Enunciator**, being the first attempt to arrange words in separate classes, by the consonant combinations, with a new and simple method of indicating the sounds of the vowels and diphthongs—said to offer the greatest facilities for teaching Orthography and Pronunciation, including a distinct articulation.

**Gradual Lessons in Grammar, or Guide to the construction of the English Language**, by the analysis and composition of sentences, with a Sequel in the same book, containing a clear development of the principles of Grammar, on a new plan, which will commend itself as rational and philosophical to every teacher. This book, so teachers say, will produce a great change in the instruction given in this science; beginning in the right way, and proceeding step by step as the child's understanding leads him on.

**Intellectual Algebra, or Oral Exercises in Algebra for Common Schools and Academies**. This work is on a new and original plan, and is the first attempt so to simplify and illustrate this series that it may be taught orally. As a discipline of the mind in teaching a child to think and reason, Algebra is pre-eminent, and this work places it in the power of younger classes to be benefited by such mental exercises. It divests the science of its mystery and repulsiveness, and brings its principles clearly before the mental vision, so simplified and illustrated that they can be readily comprehended by most pupils from ten to twelve years of age.

**Ackerman's Natural History**—The design of this work is to awaken a spirit of inquiry in the minds of youth, by bringing before them, in as condensed and simple manner as possible, some of the most interesting portions of the History of the Animal kingdom. It is intended as a Reading and Recitation book, and is already extensively used in the first class of public schools.

**Guernsey's History of the United States of America**—Designed for Schools; extending from the discovery of America by Columbus to the present time; with numerous Maps and Engravings, together with a notice of American Antiquities and the Indian Tribes. By Egbert Guernsey, A. M. Two introductory chapters are introduced, containing an account of American antiquities and a History of the Indian tribes. In colonial history no important point has been passed over; while a larger space has been devoted to the Revolutionary War than is usual in school histories.

The biography of each President of the United States is given in connection with his administration. Throughout the entire work the mind of the pupil is particularly directed to an overruling Providence, whose protecting care has been so often manifested in our national existence. The work is printed on large open type, well bound, and contains 450 pages 12m.

New and elegant book on Astronomy, in quarto form. **Smith's Illustrated Astronomy**—designed for the use of the Public or Common Schools in the United States.—Illustrated with numerous original Diagrams, by Asa Smith, Principal of Public School No. 12, of the city of New York.

It has been the object of this Manual of Astronomical Science to present all the distinguishing principles in physical astronomy with as few words as possible, but with such ocular demonstrations, by way of diagrams and maps, as shall make the subject easily understood. The letter press descriptions and the diagrammatic illustrations will invariably be found at the same opening of the book; and more explanatory cuts are given and at much less price than have been given in any other elementary astronomy.

Booksellers, Merchants, Teachers, &c., can be supplied at fair prices, for cash or approved credit, with any kind of School and Miscellaneous Books, by  
**CADDY & BURGESS, 60 John st.**  
The above Books are for sale at the Store of A. McKELVIN, Athens, Tenn., and J. A. & C. W. COFFIN, Madisonville, Tenn.

Feb. 7, 1851—3m 124

#### Teacher Wanted

A TEACHER is wanted to take charge of Poplar Hill Academy. This Academy is situated about 3½ miles southwest of Athens—the building is large and comfortable, and the location as healthy as any in East Tennessee. It is in the midst of a populous section, and a good teacher would not fail to be liberally supported. It is desirable to obtain a person to take the school on his own responsibility, and every effort will be used by the people of the neighborhood to make it large and profitable to the Teacher. No one but a thorough English scholar need apply. Application can be made to either of the subscribers, in the neighborhood, or through the post office, Athens, Tenn.

M. D. ANDERSON,  
C. STAPLES,  
J. R. HOWARD.

A man with a family can obtain a very comfortable residence convenient to the Academy.  
Feb. 7, 1851—3t 124

#### Chancery Court, Pikeville.

OFFICE OF THE C. & M. J. January Rules, 1851.  
Hugh F. Gilbreath,  
Clerk.

Samuel R. Gilbreath.  
ON motion, and it appearing that the defendant is a non resident of this State, it is ordered that publication be made in the Athens Post, a newspaper published in the town of Athens, McMinn county, Tennessee, for four successive weeks, requiring said defendant to appear on or before the next term of the Chancery Court, to be held at Pikeville, Bledson county, Tenn., on the 24th Monday of March next, and answer the complainant's bill, or the same will be taken for confessed, and set for hearing ex parte.

THOS. N. FRAZIER, C. & M.  
Jan. 15, 1851—4t 124

#### Over Shoes.

A SUPERIOR lot of Over Shoes, new style, for sale at  
Nov. 15 J. JACKSON & LILLARD'S.

**Notice.**  
A LIST of unpaid taxes, McMinn county, for 1849, 1850, has been left with the subscriber, who is authorized to receive and receipt for the same. Persons who have not paid their taxes for the above years can settle them by calling on him immediately.  
S. K. REEDER.  
Jan. 21, 1851.—tf 122

A SUPERIOR assortment of Hats—Moleskin, Congress, California, Mexican, &c., for sale by  
Nov. 29. JACKSON & LILLARD.

#### Land for Sale.

THE undersigned is desirous of selling his LAND, in McMinn county, four miles West of Athens, on the waters of Mouse Creek. The tract contains 260 acres—50 or 40 acres of which are Creek bottom, and not inferior to any land in the county. There are some eight or ten excellent Springs on the land, so that good water can be had in every field, also two good young Orchards. There are on the premises a comfortable dwelling house, and all necessary outbuildings. He also proposes to sell his stock of Horses, Cattle, Sheep, Hogs, Farming Utensils, &c. The terms will be made accommodating. Persons wishing to purchase are invited to call and examine for themselves.

It will be previously disposed of, if it will be offered at public sale, on the premises, on Thursday, the 20th of February next.  
JAS. W. McSPADEN.  
McMinn co., Jan. 10, 1851—4t 120

#### Overcoatings
